VIKRAM SINGH

AI Full Stack Engineer | Building Intelligent End-to-End Products —
Frontend · Backend · AI · DevOps | React · NestJS · AWS · LLMs
Ahmedabad, Gujarat, India

Summary

AI Full Stack Engineer — I build intelligent, production-ready products from the ground up. With 3+ years of experience across frontend, backend, AI integration, and cloud infrastructure, I own the full lifecycle of everything I ship. From architecting LLM-powered workflows and async event-driven backends handling 20–40 RPS, to deploying scalable systems on AWS — I care deeply about systems that actually work in production. My work sits at the intersection of AI and full-stack platform engineering:- Building AI chatbots and LLM-integrated features using OpenAI APIs, LangChain, and Prompt Engineering- Designing stateful AI orchestration layers and async pipelines that eliminate API blocking- Architecting KPI aggregation engines processing 5k–10k events/day with fault-tolerant integrations- Delivering cross-platform desktop apps (Electron.js) with clean modular architecture end-to-end- Deploying production systems on AWS with Docker, CI/CD pipelines, and Supabase I don't specialize in a single layer — I specialize in making all layers work together intelligently. If you're building an AI-powered product and need an engineer who can take full ownership from database schema to deployed UI, let's talk. Stack: NestJS · Node.js · React · Next.js · TypeScript · PostgreSQL · Redis · AWS · Supabase · Docker · LangChain · OpenAI API · LLM APIs · Shopify · Electron.js

Experience

BrainerHub Solutions

AI Full Stack Engineer

January 2025 - Present (1 year 3 months)

Ahmedabad

AI Full Stack Engineer — designing and delivering intelligent, production-ready products end-to-end.

Key contributions:

- Built a Shopify AI chatbot using OpenAI API & LangChain with LLM-driven product search, order lookups, and conversational shopping flows — reducing customer support load and improving conversion
- Architected a NestJS backend for a multi-purpose AI platform: stateful session orchestration, async pipelines, and resilient third-party integrations with retries, timeouts, and graceful degradation
- Designed scalable event-driven pipelines with Supabase, Redis, and AWS supporting KPI aggregation at 5k–10k events/day with fault-tolerant integrations
- Delivered a production-ready Electron.js cross-platform desktop app with optimized performance and clean modular architecture
- Implemented CI/CD pipelines and Docker-based deployments on AWS for reliable production releases

Stack: NestJS · Node.js · TypeScript · React · Next.js · PostgreSQL · Redis · AWS · Supabase · Docker · LangChain · OpenAI API · LLM APIs · Electron.js · Shopify APIs

ASV INFOMEDIA

Full Stack Developer

November 2022 - December 2024 (2 years 2 months)

Chennai, Tamil Nadu, India

Built and owned custom e-commerce platforms and backend systems for merchant clients:

- Engineered custom Shopify checkout flows and backend logic, directly improving merchant conversion rates
- Developed full Shopify themes with third-party API integrations, AI-powered product recommendations, and advanced storefront customizations
- Delivered end-to-end branded e-commerce experiences for multiple merchants — from architecture through deployment

Stack: Shopify · Liquid · JavaScript · Node.js · REST APIs · AI Recommendations

Education

The 10x Academy

Full Stack Developer, Computer Software Engineering · (August 2022 - March 2023)

Indira Gandhi National Open University

Bachelor of Arts - BA, Clinical Psychology · (July 2021)
